

I am writing in response to the new broadcast service (LPFM) that would allow these stations to take precedence over Christian stations such as K-LOVE. K-LOVE and its affiliate stations are the only stations I listen to and support in my community since all the other stations have no value to me and are often very commercially laden and at often times indecent. Should the option of Christian stations be displaced by LPFM, it would have a lasting ramification on me personally as well as the millions of listeners to these stations. I believe Christian stations such as K-LOVE help me get informed relevant to my community and the world and also allow me to have a choice in the type and quality of music I and my family are exposed to. Clearly, with all of the problems the FCC has faced in the last year with indecency on the air and in the media, why would you allow a wholesome quality broadcast be replaced by more junk. I hope you will secure a place on the FM translator service for K-LOVE and its affiliate Christian stations. If not, I will no longer choose public access radio of any kind and that upsets me as a citizen and a tax-payer since you would eliminate the only option for me on radio. Thank you for your consideration to keep K-LOVE and other Christian stations active and accessible on FM.
